

***Knowtes Note-Taking Application User Guide***

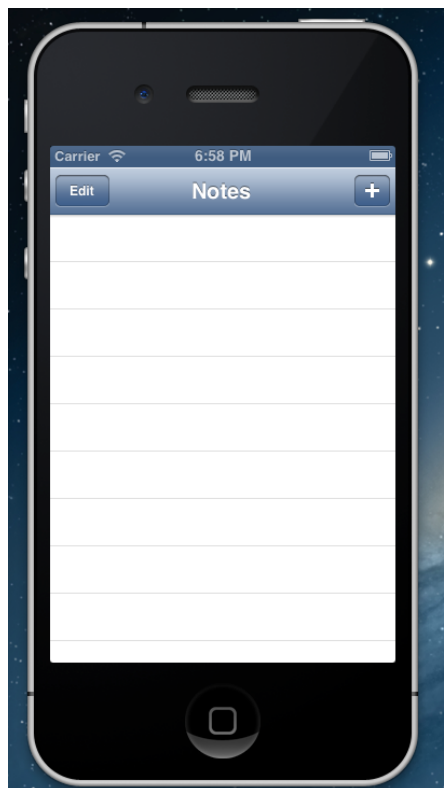

iOS, Spring 2014

Lucy He (lh2574)

### Step One

Open up the application by clicking on the *Knowtes* application icon.

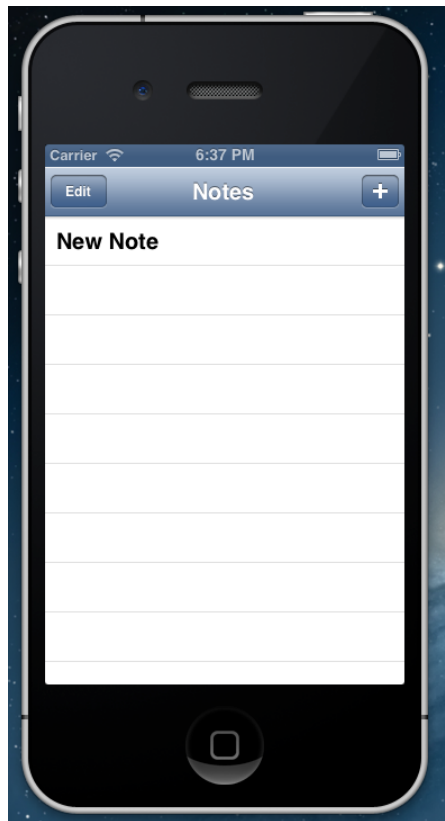

### Step Two

The application's main screen will open. (There may be a slight delay for this to load.) All your notes can be found from this page.

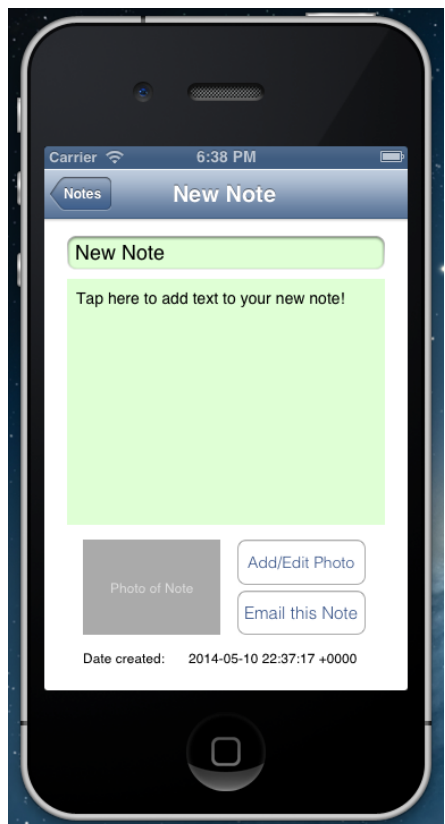

Clicking the Edit button at the top left will allow you to delete existing notes. (More about this later.)

Clicking the + button on the top right will add a new note.

### Step Three

When a new note is added, a new row appears in the main screen. Clicking on this new note will allow you to add content to the new note.

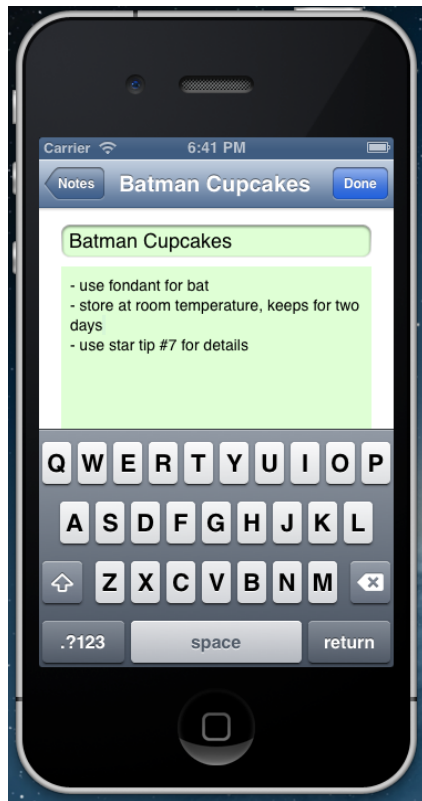

### Step Four

Clicking on a new note row will bring you to this screen. You can edit the name of the top by tapping on “New Note” at the top. You can edit the body of the note by tapping in the main text field. (See Step Five for more.)

You can also choose to add a photo attachment to your note. Clicking on the “Add/Edit Photo” button will allow you to add a photo to a new note, and clicking the same button later will allow you to edit that photo. (See Step Six for more.)

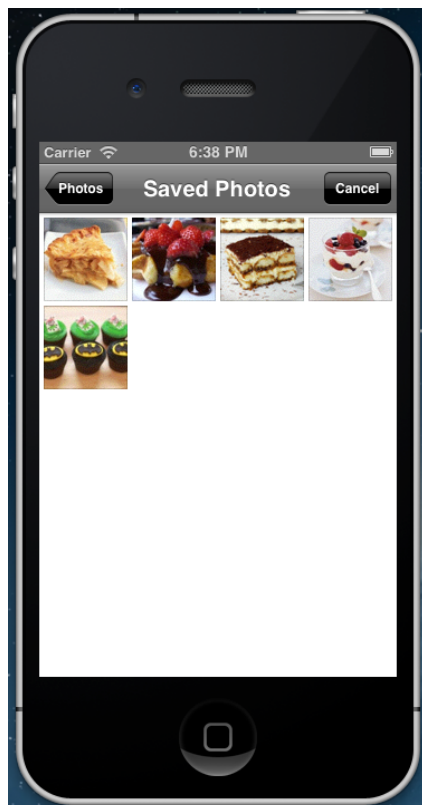

Clicking on the “Email this Note” button will email this note. (See Step Nine for more.)

### Step Five

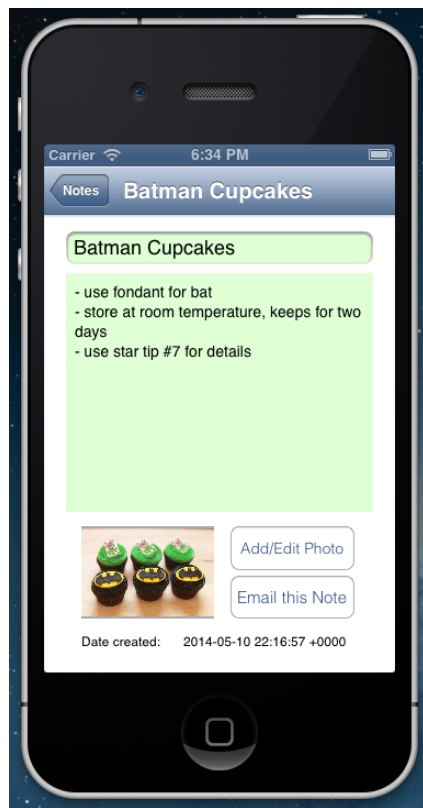

When you're editing the title, hit return to save your changes.

When you're editing the body text of your note, click the "Done" button on the top right to save your changes.

### Step Six

When you want to add a photo, click on the "Add/Edit Photo Button". This will allow you to select a photo from your iPhone's library. Click on the photo you want to use with this note.

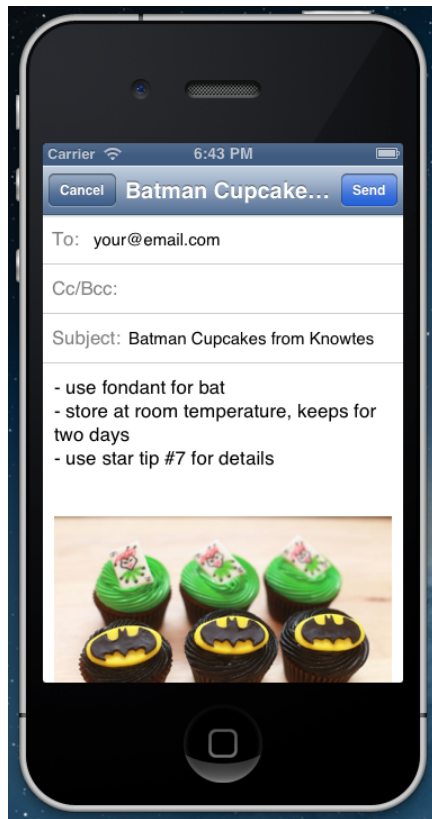

### Step Seven

After you've updated the text and photo, your note will look more like this.

### Step Eight

If you ever want to see your photo enlarged, simply tap on the photo and it will fill the screen. Click on the button on the top left to return to your note.

### Step Nine

To email your photo, tap on the “Email this Note” button. The mail screen will open. Type in the recipient email, and add any other information you would like to include in the email before clicking send.

By default, the email subject will be the name of the note + “from Knowtes”. The body of the email will be the note text, and the image will be attached.

### Step Ten

When you’re done editing or mailing a note, you can return to the main Notes page by clicking the top left button that says “Notes”.

### Step Eleven

To delete a note, click on the “Edit” button on the top left of the main notes page. A red alert sign will appear next to each note. Clicking on the sign will make a delete button appear. Clicking that button will delete your note.

Thank you for using Knowtes!
